Subject: Silver Stream Sewer Easement

Dear John:

This email is to bring you up to date with discussions I had with Jeanette Torres and with Dick McGoey last week. I have received from your office a map and metes and bounds description of the sewer easement for Silver Stream Trailer Park. You provided me with a map, which is more than adequate and also with a metes and bounds description. However, since the easement covers two lots, the metes and bounds description must relate to each lot separately. In short, the map is good for both properties, but I would like to file separate easements for each lot which would include a separate metes and bounds description for the portion of the easement on that lot only.

Also, the easement for each lot should continue across Bivona Lane to the adjoining lot on the West so the sewer line easement is complete through the road.

Prior to the commencement of any work, please confirm that it has been authorize by Ms. Torres and I would ask her to advise me if she has any questions or concerns.
